## About

I am a fresh graduate with hands-on knowledge of HTML, CSS, JavaScript, Node.js, Express, MongoDB, and SQL. I have worked on small projects where I practiced building websites and simple backend features. I am always ready to learn new technologies, improve my skills, and work with a team. I am looking for an opportunity where I can grow as a developer and gain real-world experience.

## Projects

### Full-Stack Developer (Self-Initiated Projects)

Built and deployed full-stack applications using Html, CSS, Js, Node.js, MongoDB, and SQL, covering authentication, CRUD, and reporting features

#### ❖ Urdu Speech Therapy Web App (FYP)

- Designed and developed a full-stack speech therapy platform tailored for Urdu speakers to improve pronunciation and fluency.
- Integrated speech recognition (Web Speech API) to evaluate user pronunciation against standard phonemes.
- Implemented a quiz system with categorized levels (easy, medium, hard) and automatic feedback/report generation (PDF) based on accuracy and phonetic analysis.
- Therapist module included for manual assessment and verification.
- Used Node.js (backend), Express (API routing), MongoDB (database), and EJS (templating engine).
- Presented at SEE Pakistan 2025; praised for its social impact and usability by therapists and educators.

#### ❖ E-Commerce Platform

- Built with HTML/CSS/JS
- Features: Cart, checkout, admin control panel
- Strengthened backend logic and database interaction.

## ◆ Hotel Management System

- Stack: HTML, CSS, JS, MySQL
- Managed customer records, reservations, billing system

## ◆ Netflix UI Clone

- Built with HTML/CSS/JS
- Focused on layout design, responsiveness, UI/UX matching
